

Food and Beverage

This module is the perfect way to manage all your food & beverage needs from inventory to sales.

With its highly customizable interface, you are able to create multiple menus, menu categories and table areas.

Food & Beverage can be used by itself, and/or in conjunction with other Tracker modules, which makes it a very valuable add-on.

The screenshot displays the 'Food & Beverage Tracker' application window. The interface includes a menu section on the left, a central menu grid, and a right-hand panel for order management.

Menu Section: Bar, Beverages, Breakfast, Dinner, Kids Menu, Lunch, Retail, More...

Beverages Menu Items:

2% Choco Milk	2% White Milk	Apple Cider
