

Scheduling

Say goodbye to the pencil and eraser. The scheduling module is designed to replace large paper based scheduling systems, with a highly easy to use, point and click interface.

Booking and scheduling appointments, just got a lot easier. With its highly customized interface, you are able to create categories with resources for booking and scheduling.

A paper based day sheet is also available for printing with appointments already in the correct time slots.

The scheduler can be used by itself, and/or in conjunction with P.O.S. Tracker or People Tracker, which makes it a very valuable add-on.

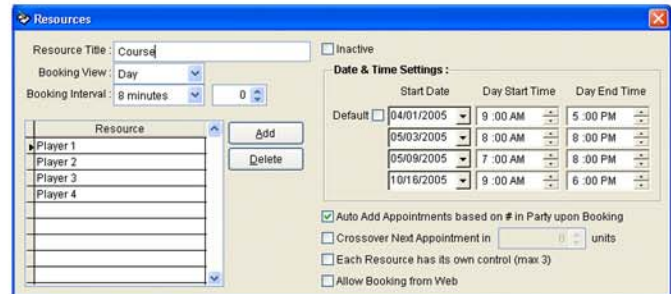

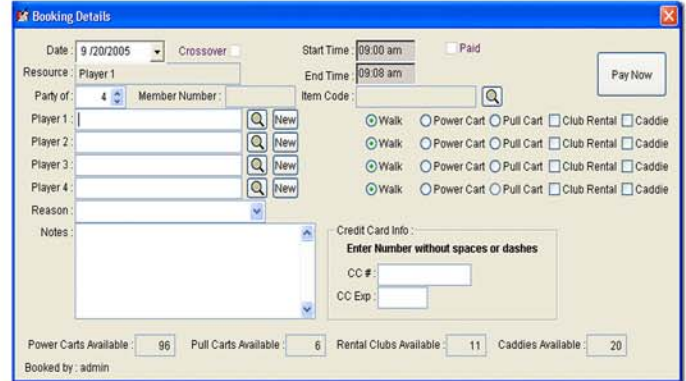

The screenshot displays the 'Schedule Tracker' application window. The title bar reads 'Schedule Tracker'. The menu bar includes 'File', 'Edit', 'Records', 'Window', and 'Help'. The toolbar contains icons for 'View', 'Report', 'Prev', 'Next', 'Today', 'New', 'Update', 'Delete', 'Save', 'Cancel', 'Search', 'Refresh', 'Return', 'Customer', and 'Logoff'.

The main interface is divided into several sections:

- Course:** A blue sidebar on the left contains icons for 'Player 1', 'Player 2', 'Player 3', and 'Player 4'.
- Lessons/Clinics:** A dropdown menu is currently set to 'The Diner', with 'The Patio' as an alternative option.
- Calendar:** A calendar for September 2005 is shown at the bottom left, with the date '23' circled in red. Below the calendar, it says 'Today: 9/23/2005'.
- Booking Grid:** The central area is titled 'Booking : Course - Friday September 23, 2005'. It features a grid with time slots on the y-axis (from 7:00 AM to 9:08 AM) and four columns for 'Player 1', 'Player 2', 'Player 3', and 'Player 4'. All cells in the grid are currently empty and yellow.
- Navigation:** At the bottom of the grid, there are 'Booking' and 'Scheduling' tabs.
- Status Bar:** The bottom right corner shows 'NUM' and the time '1:31:10 pm'.

Key Benefits

- Book for Multiple Resource within the same system
- Set different Date and Time settings for each resource
- Day, Week, Month and Year Views
- Able to set 5 to 10 minute or 15, 30 and 60 minute Appointment Intervals, or any interval between 1 and 60 minutes
- Book or Schedule appointments at any start time and any duration
- Easy navigation from day to day or week to week
- Eliminate multiple bulky paper schedules for different resources
- Repeat, Drag and Drop, Copy and Paste appointments
- Create custom Pre-booked Template appointments
- Book multiple appointments in the same time slot
- Process payments with a pre-selected item code when used in combination with POS Tracker
- Customizable Appointment Reason List
- Color code Appointment Reasons for easy identification
- Able to set default View, Interval, Day Start and Day End Times for each resource
- Day/Starter sheet and Appointment Summary Reports
- Auto Add linked appointments
- Crossover linked appointment across multiple resources
- Interactive real-time online interface available
- Power Cart Fleet Tracking and Return
- Pull Cart Fleet Tracking
- Caddie Tracking
- Multi-user enabled
